Type of contract: Internship

Field: Biotech / Health / Antibiotic resistance

Working time: Full-time

Location: Lyon Gerland, France

Length: 6 months

Ref: ATX24-11

Start date: As soon as possible

Become part of a team of 20 employees, united by strong values: excellence, shared vision, team spirit and respect. In our dynamic and multicultural environment, you'll actively contribute to rewarding projects while developing your skills. We offer you an environment conducive to professional and personal growth. Let's build the future together!

Presentation of the company:

AUROBAC THERAPEUTICS is a biopharmaceutical company founded in 2022 by three highly renowned life sciences innovation companies, Boehringer Ingelheim, Evotec and bioMérieux.

Dedicated to addressing high unmet medical needs associated with infections in acute hospital settings, amidst the growing antimicrobial resistance (AMR) epidemic, AUROBAC is advancing a robust pipeline of drug candidates.

With strong growth ahead, within an international environment, the company is now looking for a **Business Development and Strategic Intelligence Intern** for a 6-month period.

Missions:

- **Participate to Scientific and Strategic Intelligence Activities**
 - Conduct comprehensive analyses of competitors' activities, including research initiatives, market positioning, and product sales in order to inform strategic decision
 - Present key outcomes of the Scientific and Strategic Intelligence work in cross-functional team meetings
- **Support the Business Development Activities**
 - Identify and assess potential business opportunities, partnerships, and collaborations
 - Analyze epidemiological data, healthcare, regulatory, reimbursement landscapes, market trends, and industry developments to inform strategic decision-making
 - Prepare scientific, medical and business development conventions and events
 - Actively contribute to the development of communication materials for the company
- **Contribute to Public Fundraising Activities**
 - Search for and analyze public funding opportunities that could fit with AUROBAC's portfolio of projects
 - Collaborate with cross-functional teams to support the successful submission of funding applications, working closely with the BD team

Personal skills:

- Fluency in French and English (spoken and written) is essential
- Rigorous, with strong analytical and synthesis skills
- Excellent organizational and communication skills

- Ability to work both independently and collaboratively in a fast-paced research-driven environment

Experience:

- Master 2 level with a scientific background (e.g., pharmacy, engineering, biology) and an interest in business
- Knowledge of the drug development and commercialization cycle is a valuable asset

Perks

Meal vouchers and on-site restaurant

Public transport contribution

Gym and collective classes access

Concierge
